TRAINING	TRAINING DESCRIPTION	SESSIONS, DATE AND TIME	COSTS PER PARTICIPANT (Kshs)
<p>Unix Administration</p>	<p>This is an intensive instructor-led and hands-on training on how to install, upgrade, secure and competently manage the Unix operating system. The course focuses on task-oriented competency and uses a hands on methodology to provide the learner with the confidence and experience needed to actually perform on the job. Overall, after attending this course, trainees will be able to install, upgrade, secure and competently manage the Unix operating system on standard hardware, and use it to provide essential services on a network such mail, web, database, application and proxy servers. This course effectively prepares you for the Sun Certified System Administrator (SCSA) and Linux Professional Institute (LPI) certifications.</p>	<p>Quarter 1 23rd - 27th February</p> <p>Quarter 2 25th - 29th May</p> <p>Quarter 3 24th - 28th August</p> <p>Quarter 4 7th - 11th December</p> <p>(8.30am – 5.00pm)</p>	<p>40,000 VAT Exclusive</p>
<p>Linux Administration</p>	<p>An intensive course on how to install, upgrade, secure and competently manage the Unix/Linux operating system. It also covers setting up web servers, nameservers, mail servers, and backup procedures. Leads to Red Hat Certified Engineer or Linux Professional Institute (LPI) certifications.</p>	<p>Quarter 1 23rd - 27th March</p> <p>Quarter 2 22nd - 26th June</p> <p>Quarter 3 21st - 25th September</p> <p>Quarter 4 2nd - 6th November</p> <p>(8.30am – 5.00pm)</p>	<p>40,000 VAT Exclusive</p>
<p>Ethical Hacking</p>	<p>Computers around the world are systematically being victimized by rampant hacking. This hacking is not only widespread, but is being executed so flawlessly that the attackers compromise a system, steal everything of value and completely erase their tracks within 20 minutes. The goal of the ethical hacker is to help the organization take preemptive measures against malicious attacks by attacking the system himself; all the while staying within legal limits. This philosophy stems from the proven practice of trying to catch a thief, by thinking like a thief. As technology advances and organization depend on technology increasingly, information assets have evolved into critical components of survival. If hacking involves creativity and thinking 'out-of-the-box', then vulnerability testing and security audits will not ensure the security proofing of an organization. To ensure that organizations have adequately protected their information assets, they must adopt the approach of 'defense in depth'. In other words, they must penetrate their networks and assess the security posture for vulnerabilities and exposure. The definition of an Ethical Hacker is very similar to a Penetration Tester. The Ethical hacker is an individual who is usually employed with the organization and who can be trusted to undertake an attempt to penetrate networks and/or computer systems using the same methods as a hacker.</p>	<p>Quarter 1 28th - 30th January</p> <p>Quarter 2 1st - 3rd April</p> <p>Quarter 3 7th - 9th October</p> <p>(8.30am – 5.00pm)</p>	<p>35,000 VAT Exclusive</p>

TRAINING	TRAINING DESCRIPTION	SESSIONS, DATE AND TIME	COSTS PER PARTICIPANT (Kshs)
<p>Certified Data Centre Professional (CDCP) Training</p>	<p>The Certified Data Center Professional course is designed to expose IT, Facilities, or Data Center Operations professionals working in and around the Data Center to the key components of the Data Center. It is the first in a series of four courses developed for Data Center Professionals.</p> <p>Business Continuity professionals will also benefit from understanding the essential elements of a high-available, fully available, and efficient Data Center, how to audit the Data Center, and will learn valuable lessons on how to enable a high-available, flexible, safe, and efficient mission critical Data Center environment for both new and existing sites.</p> <p>The CDCP course will teach you how to run a more efficient Data Center - keeping you current on standards and ever changing technologies.</p> <p>The course concludes with a certification exam. Attendees who pass the exam will receive the international and official "Certified Data Center Professional" certificate accredited by ICOR (The International Consortium for Organizational Resilience) and in addition earn 1.4 CEU credits for ICOR. OPENWORLD LTD is ICOR's regional training partner.</p>	<p>Quarter 1 5th - 6th March</p> <p>Quarter 2 4th - 5th June</p> <p>Quarter 3 3rd - 4th September</p> <p>Quarter 4 3rd - 4th December</p> <p>(8.30am – 5.00pm)</p>	<p>Ask for Quotation</p>
<p>Best Practices of System & Network Administration</p>	<p>This is an intensive course on network operations and data center documentation. Anyone who has a computer network, small office or large office, should have an adequate level of network documentation and procedures to follow in order to maintain the network. This documentation serves as the network's operations and management manual. It covers shifts and schedules, types of services and applications, responsibilities, network diagrams, request handling procedures, security policy, installation and configurations procedures among others. In this training, we will help guide you through the process of documenting your physical network, servers and server applications, and configuration using proper network documenting and diagramming techniques.</p>	<p>Quarter 1 2nd - 3rd July</p> <p>Quarter 2 26th - 27th November</p> <p>(8.30am – 5.00pm)</p>	<p>15,000 VAT Exclusive</p>

TRAINING	TRAINING DESCRIPTION	SESSIONS, DATE AND TIME	COSTS PER PARTICIPANT (Kshs)
<p>Voice over IP (VoIP) and IP Telephony (IPT)</p>	<p>Voice over IP (VoIP) and IP Telephony (IPT) IP telephony takes advantage of existing data networks, reducing operating costs by converging data and voice to only one network while enabling you to enjoy top quality voice. If you have many offices, you can enjoy free inter-office calls using VoIP and IP Telephony over the Internet or WAN. If you only have a LAN, you can enjoy a rich and flexible telephony solution with both classical PBX functionality and advanced features.</p> <p>This intensive hands-on Voice Over IP (VoIP) and IP Telephony training covers Deployment of Voice Over IP (VoIP) and IP Telephony in the enterprise. It further examines methods for constructing, managing and maintaining a converged LAN/WAN network in which all data and voice share the same network infrastructure.</p>	<p>Quarter 1 29th - 30th April</p> <p>Quarter 2 30th - 31st July</p> <p>(8.30am – 5.00pm)</p>	<p>15,000 VAT Exclusive</p>
<p>Advanced MySQL Training</p>	<p>MySQL is the world's most popular open source client-server database. In this hands-on course, attendees learn the fundamentals of writing MySQL queries and of administering the MySQL database.</p>	<p>Quarter 1 6th - 8th May</p> <p>Quarter 2 21st - 23rd October</p> <p>(8.30am – 5.00pm)</p>	<p>20,000 VAT Exclusive</p>
