Developing a Resilient Workplace - A Safe & Secure Environment

Course Description:

Developing a Resilient Workplace is the eighth course in the Essentials of Organizational Resilience Series.

To have a resilient workplace requires a highly distributed and connected environment. It is essential as well to undertake a comprehensive assessment of workplace security and safety.

Fortunately, not only is the resilient organization operationally superior, it can improve the bottom line as well. The resilient organization is the template for organizational competitiveness and survival in the 21st century. It is an organizational framework that will enable the enterprise to respond and flourish in an environment of hyper-change.

This course focuses on the importance of a highly distributed and connected workplace environment, workplace safety and security.

Learning Objectives

As a result of completing this course, students should be able to:

- Describe the elements of a safe and secure workplace
- Apply principles for responding to a crisis to ensure a resilient workplace

Delivery Structure/Course Requirements

There are 3 options for course delivery for each of the 10 courses in the series. For *each course* the requirements are as follows:

Instructor led in-house training: Includes 7 hours of live and interactive class presentations, discussions, and activities. Concludes with a 1000 word essay.

Interactive online: Includes an audio-visual presentation (approximately 1 hour in length for each course), 60-100 pages of assigned reading, participation in an online discussion group with the instructor and other students, and a 1000 word written response to a question.

Self-study: Includes course book, 60-100 pages of additional assigned reading, written submission of a discussion question (100-200 words), and a 1000 word written response to a question.

Table of Contents
- **Moving toward a people-centric structure**
